

The Shelf in 2018

10 January 2019 | Director General Bente Nyland

High activity

- Heading for a new production record in 2023
- Investments will increase in 2019
- Reduced costs
- High growth in reserves
- More exploration
- Record number of production licences
- Highest resource growth from discoveries since 2014
- Medium-sized companies playing a larger role

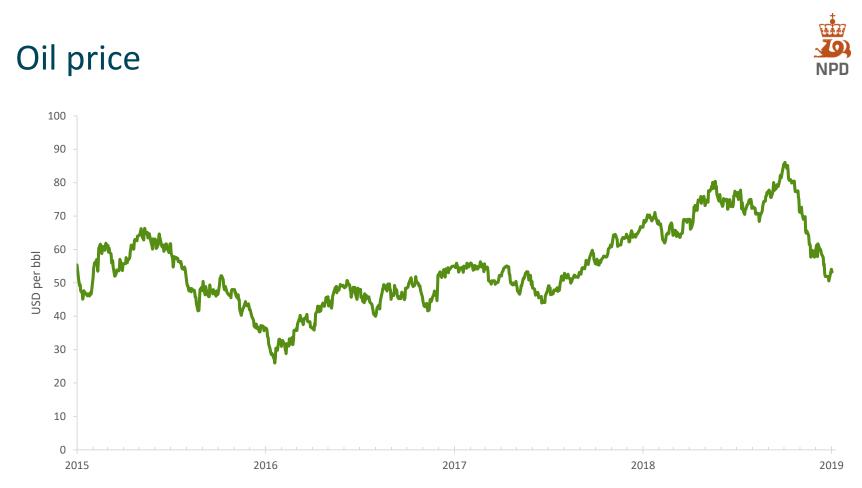

Investments

REGION STATIST

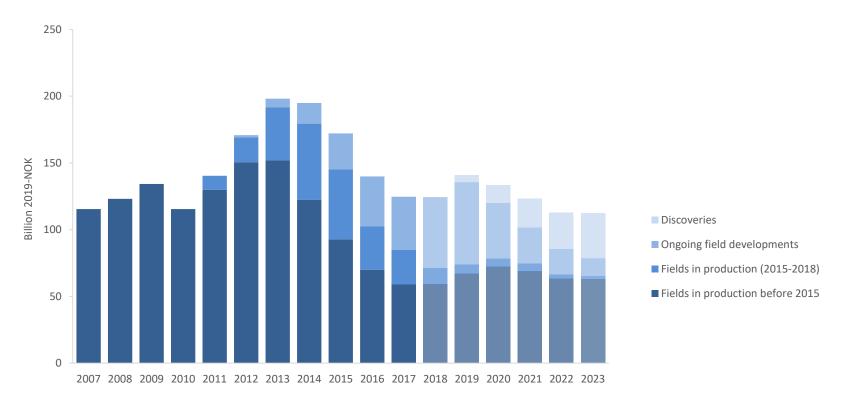

1% - K

Source: EIA, Europe Brent Spot Price FOB

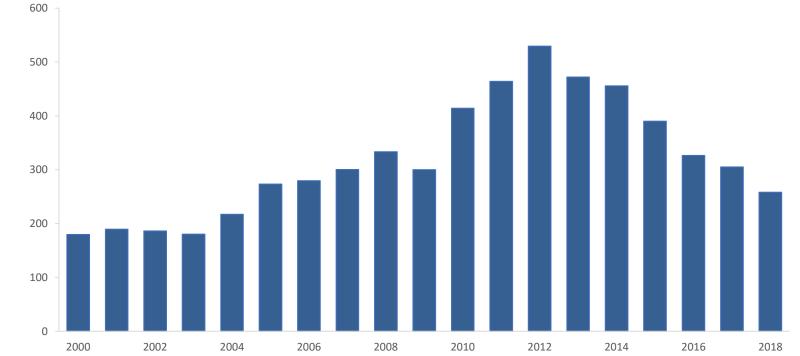

Continued high investments – growth in 2019

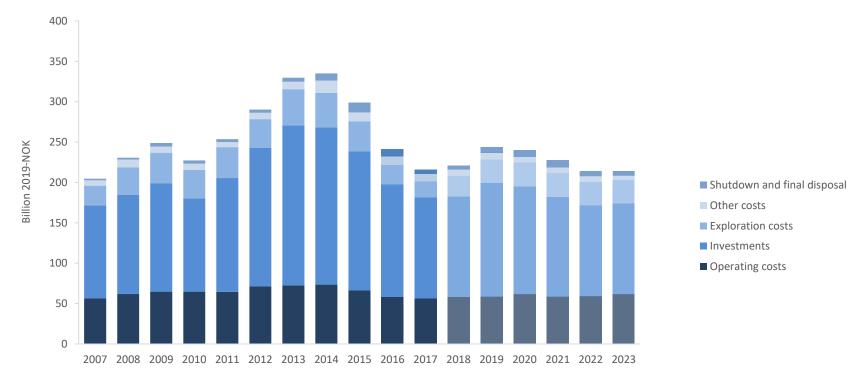

Substantial reduction in average well cost

Million 2019-NOK

Stable activity level in next five-year period – total costs

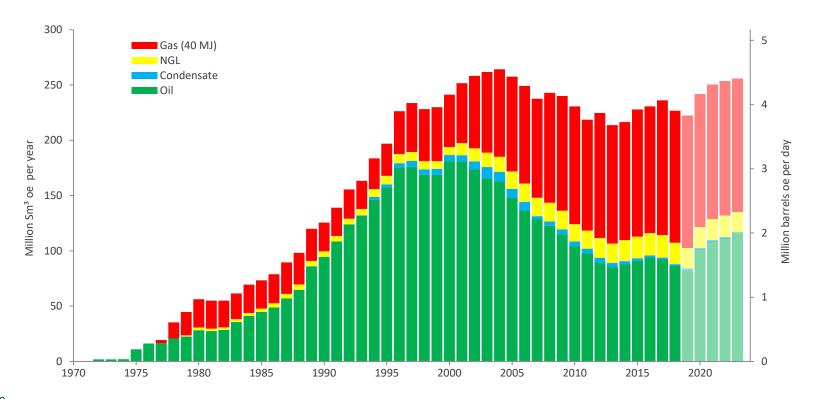

Production

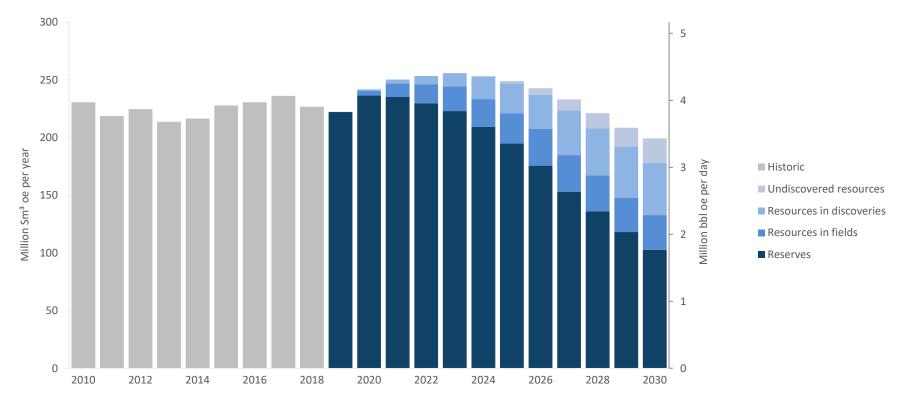

Headed for new production record in 2023

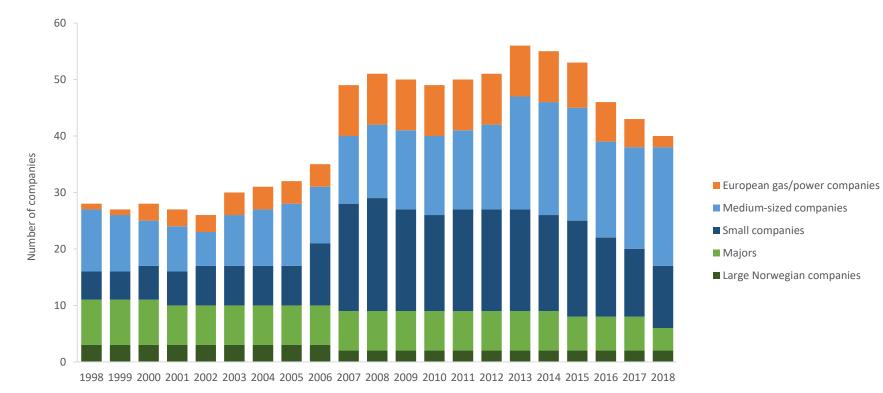

Production forecast up to 2030

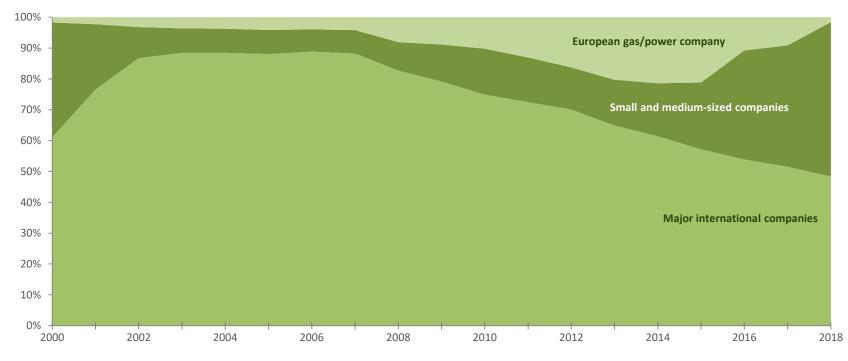

Great diversity

Small and medium-sized companies account for a larger share of production

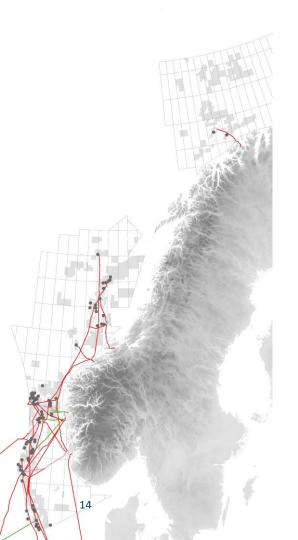

Owned production from the Norwegian shelf distributed by company group (exclusive Statoil/Equinor and Petoro)

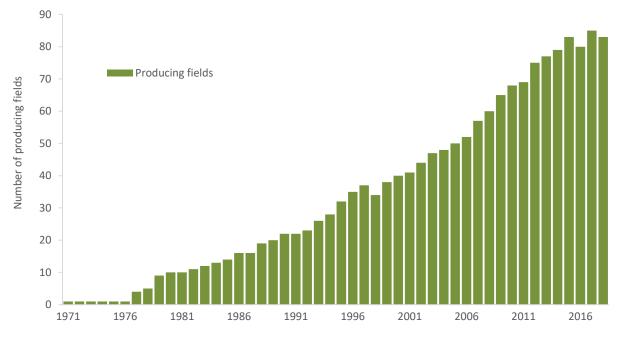

Development and operation

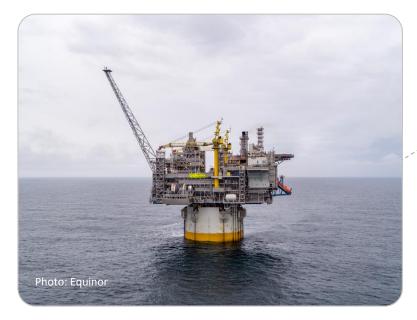

Many fields in production and well-developed infrastructure

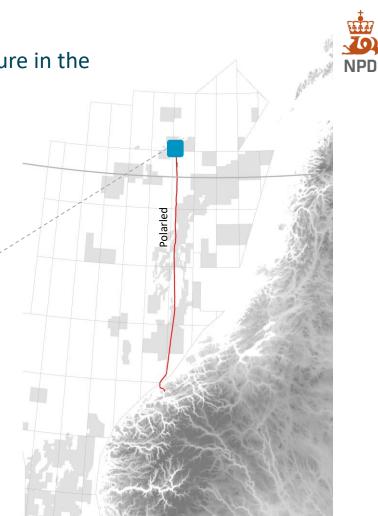

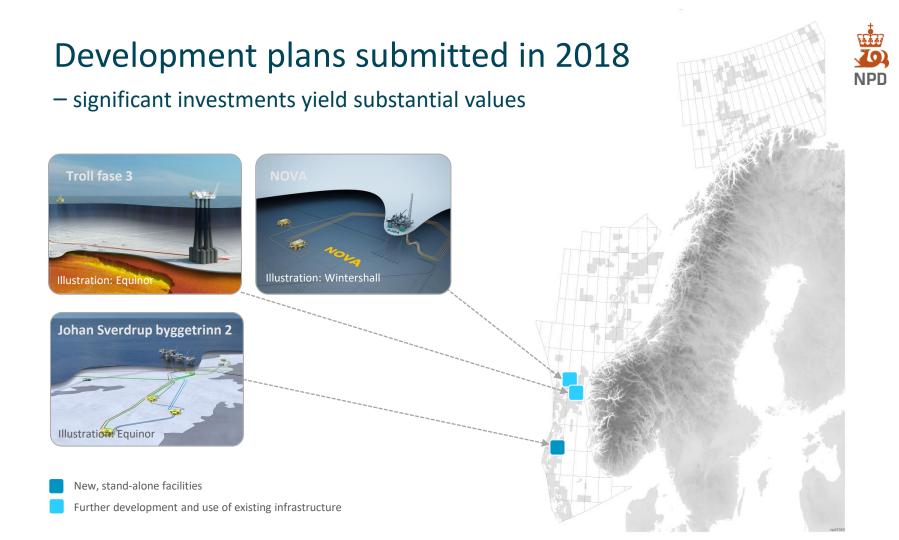

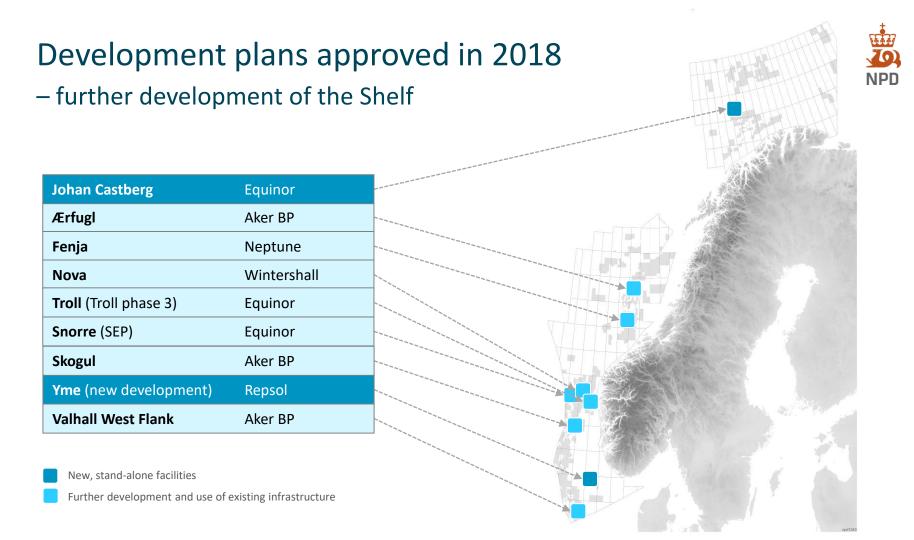

Aasta Hansteen

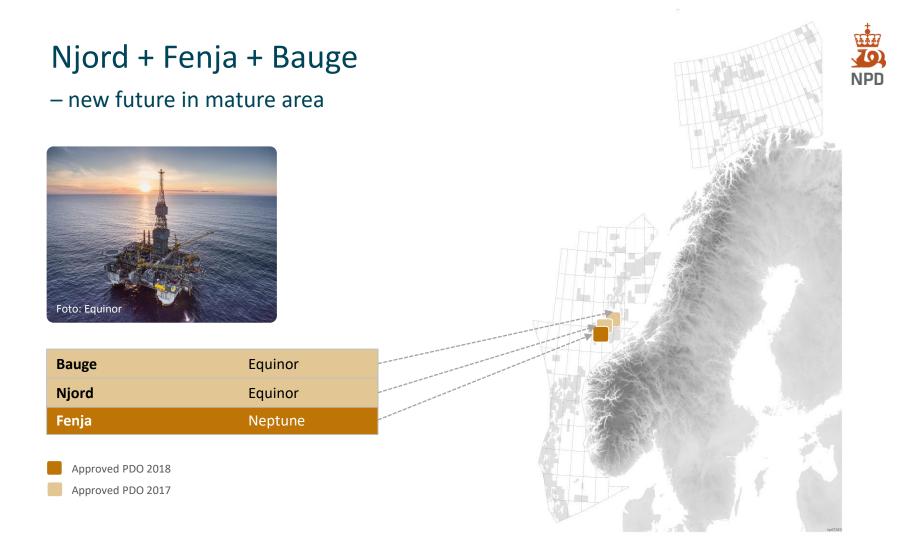

new field in production gives new infrastructure in the northern Norwegian Sea

More and better use of data and new technology creates values

NPD

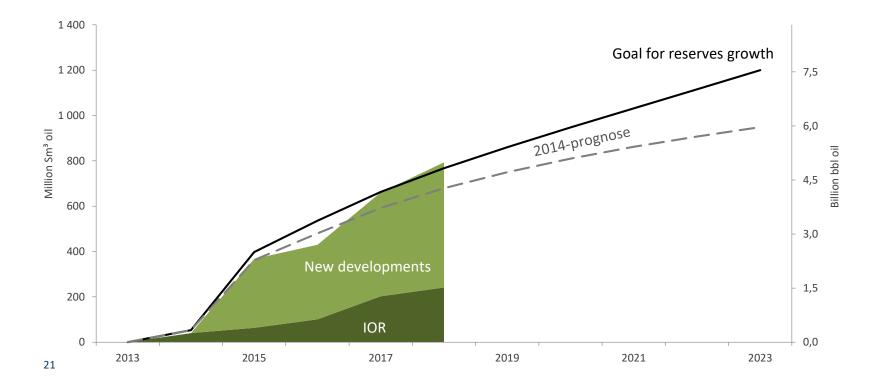

15:41

Honour and glory for increased growth in reserves...

Continued growth in oil reserves requires decisions

Emission-reducing measures

Will store CO₂

- first application for exploitation permit on the Shelf

Exploration

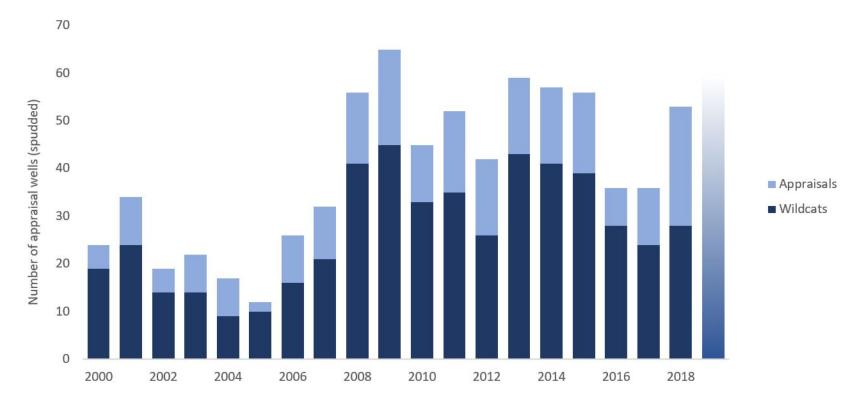

Record number of awards in 2018

2018	24 th round	APA2017							4

High exploration activity

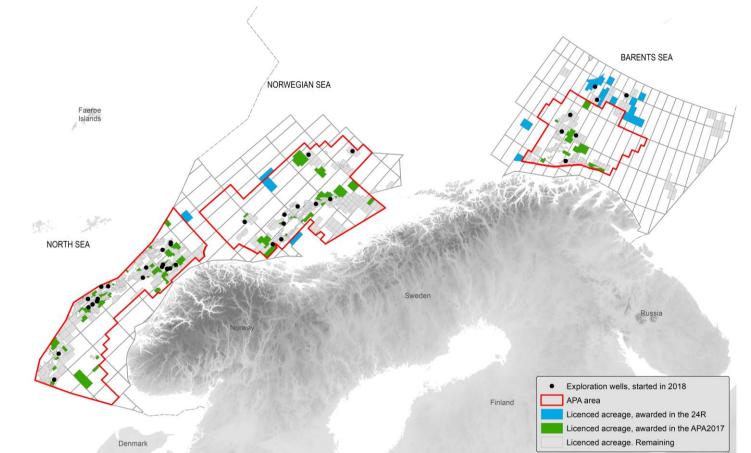

Most wells in areas near infrastructure

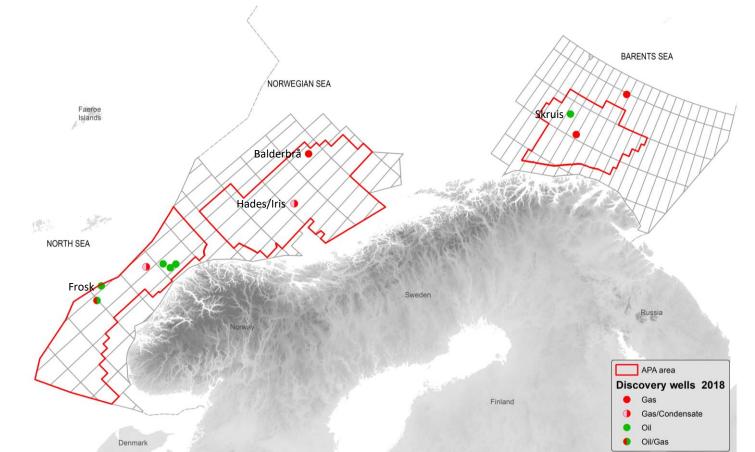

27

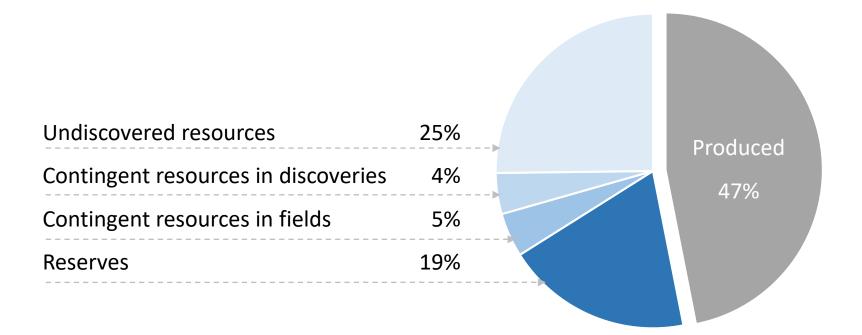

11 discoveries – good resource growth

28

More than half remains

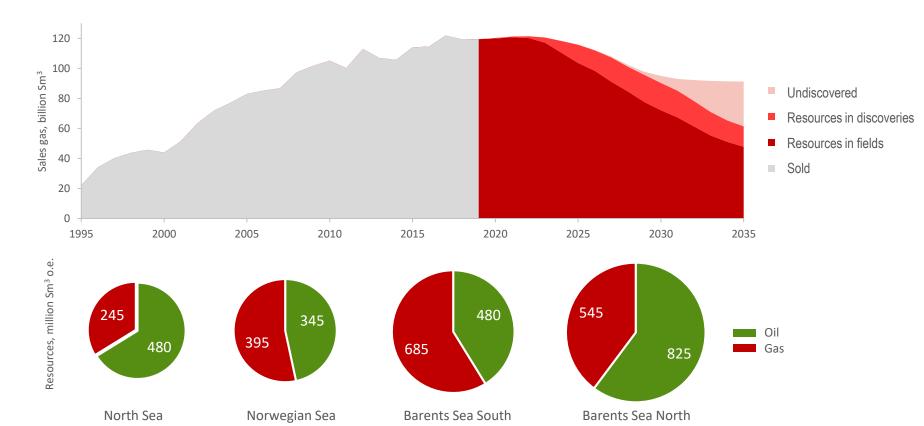

Total resources: 15.6 billion Sm³ oe

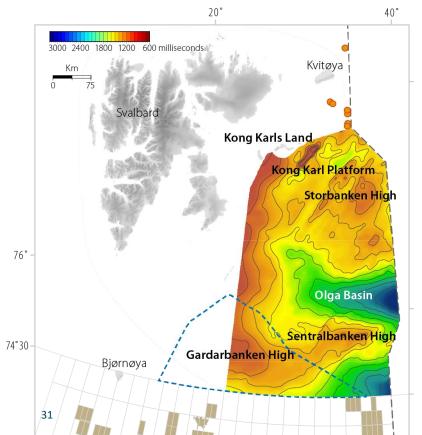

Industry must explore for gas

The Northern areas – important for making major discoveries

- Mapping in the Barents Sea North reveals major structures
- Mapping continues in the northeast towards Russia

Seabed minerals – a new chapter?

The Norwegian oil and gas story – barely half way

- High activity
- Headed for record production in 2023
- More gas to Europe
